Edit...

Select "App Shortcuts" and click the + icon

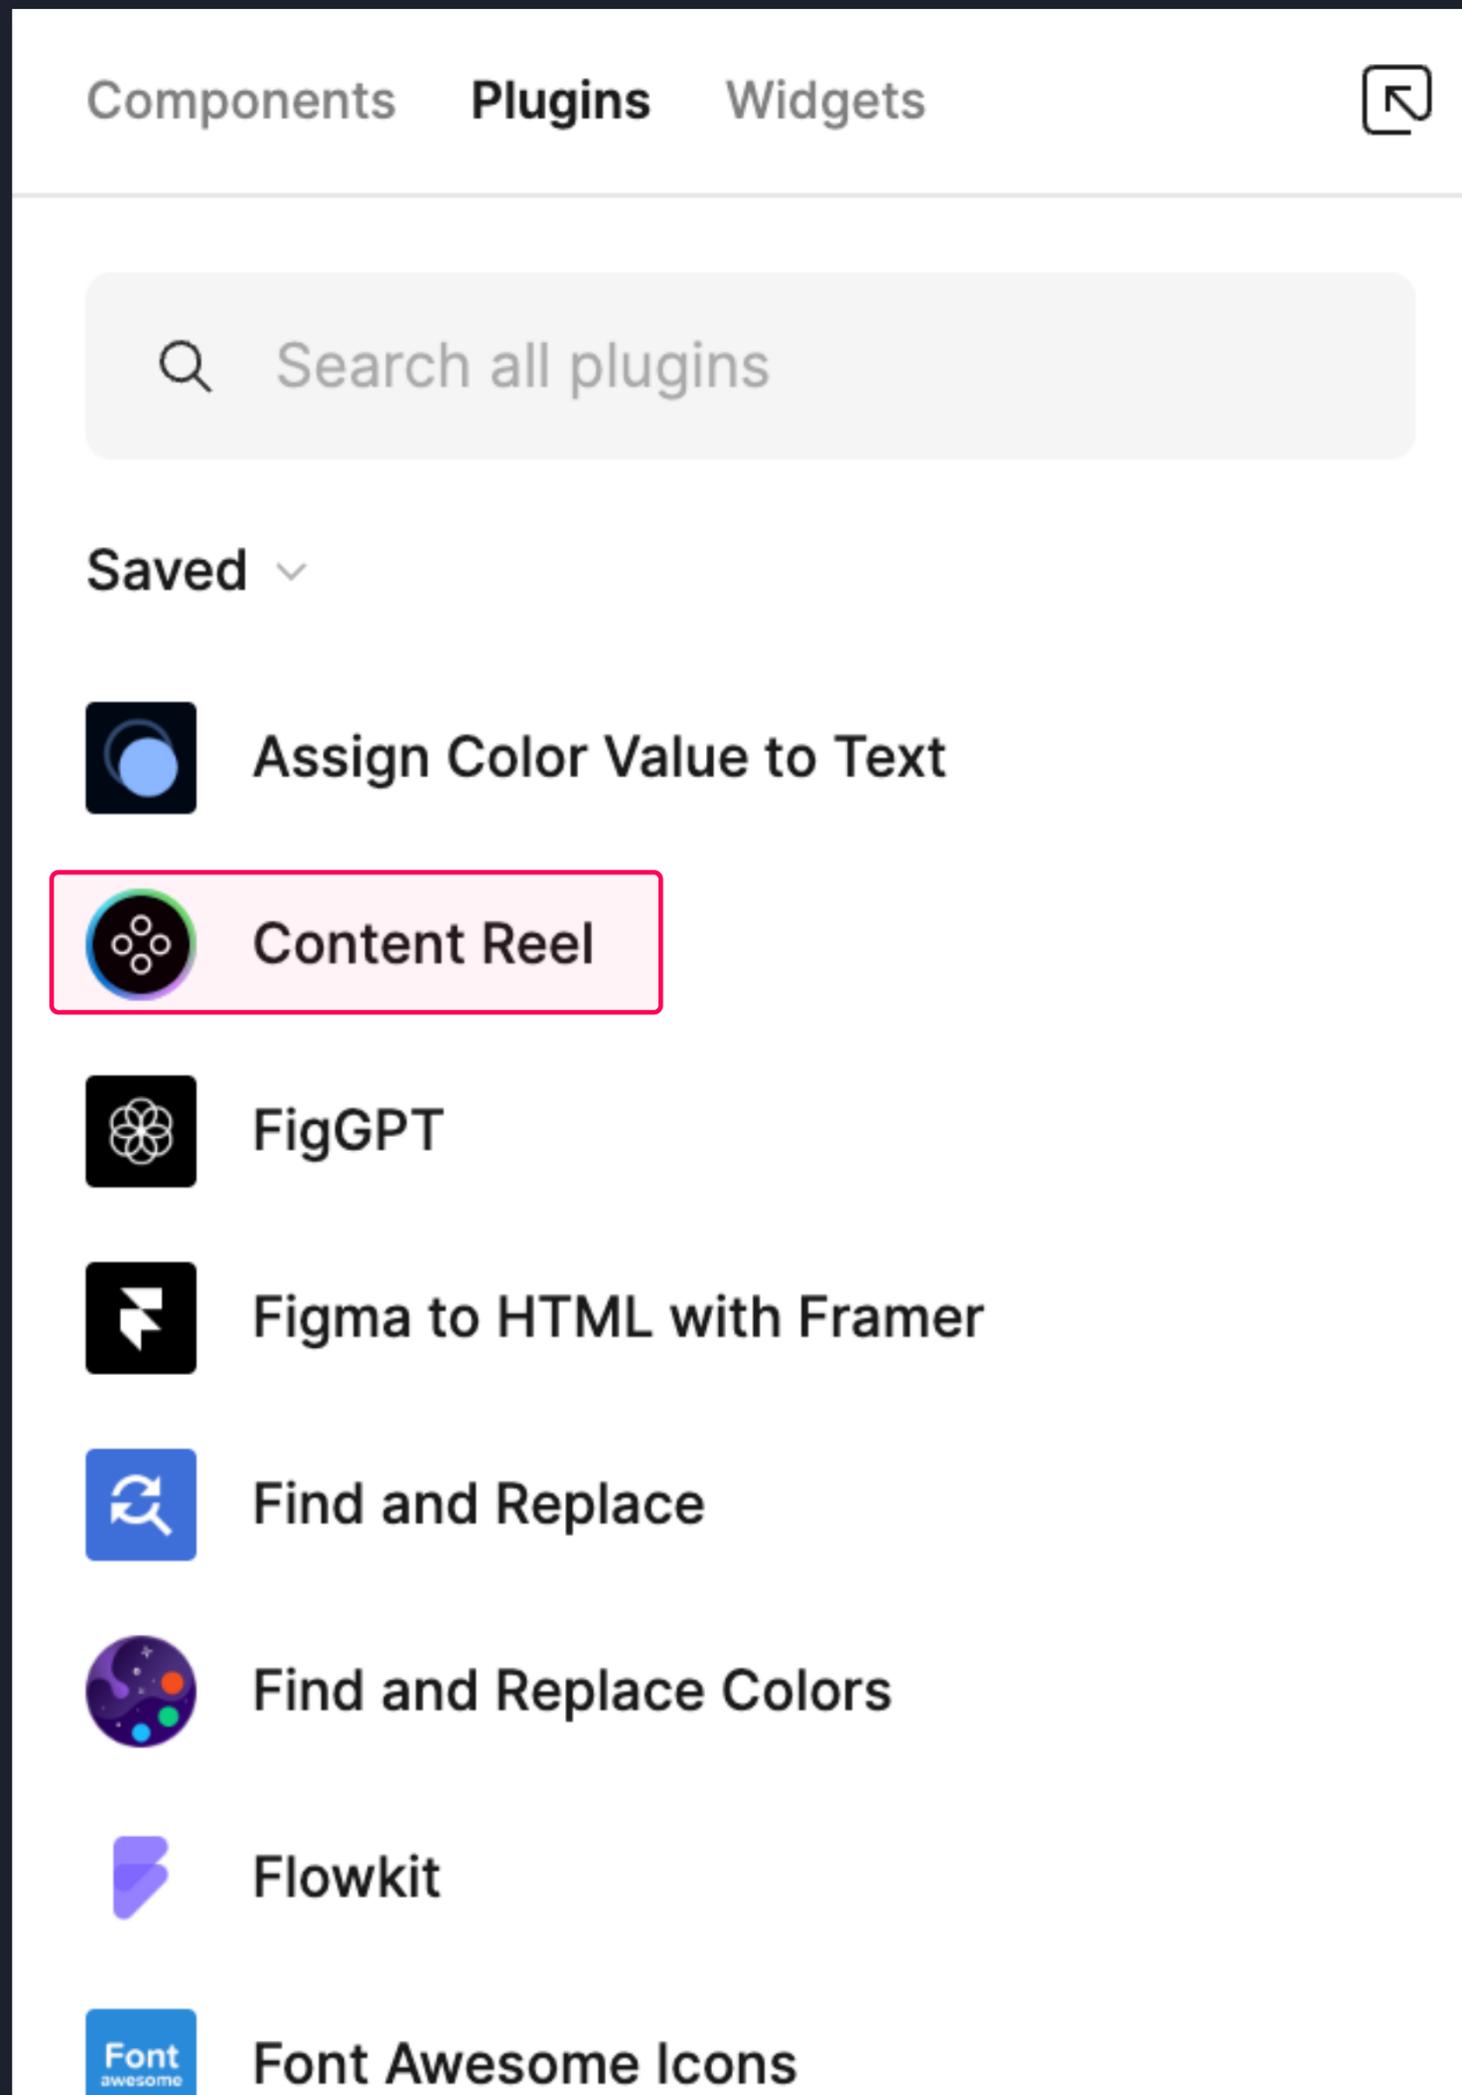

Add the exact name of the plug-in as it appears in Figma to the "Menu Title" section

The image shows a settings dialog box with three main sections: "Application", "Menu Title", and "Keyboard Shortcut".

- Application:** A dropdown menu currently set to "All Applications".
- Menu Title:** A text input field containing "Content Reel". Below the field is a placeholder text: "Enter the exact name of the menu command you want to add." A mouse cursor is pointing at the end of the text.
- Keyboard Shortcut:** An empty text input field.

At the bottom right of the dialog, there are two buttons: "Cancel" and "Done".

"Content Reel" is spelled identical to the name listed in the plug-ins drop-down

Create a keyboard shortcut for the plug-in. I like to use  $\wedge \text{⌘}$  along with the first letter of the plug-in name when possible for all my Figma plug-ins

The image shows a configuration dialog box for a Figma plug-in. It has three main input fields: 'Application', 'Menu Title', and 'Keyboard Shortcut'. The 'Application' field is set to 'All Applications'. The 'Menu Title' field is set to 'Content Reel' and has a keyboard shortcut of  $\wedge \text{⌘} C$  assigned to it. The 'Keyboard Shortcut' field is currently empty. At the bottom right, there is a blue 'Done' button. At the very bottom of the dialog, there are 'Cancel' and 'Done' buttons.

Application	All Applications
Menu Title	Content Reel
Keyboard Shortcut	

Enter the exact name of the menu command you want to add.
